EDUCATION

Oregon State University

Corvallis, OR

Bachelor of Science in Computer Science — GPA: 3.71

September 2020 - Expected June 2024

- Clubs & Activities: CTF League, Linux Users Group (WebMaster), Security Club, App Dev Club

SKILLS

Languages	Javascript, Python, C, C++, x86 Assembly, HTML, CSS, SQL, Dart
Frameworks	React.js, Node.js, Flutter, Vue.js, Next.js, Puppeteer.js
Misc. Tools	Github Actions, Git, AWS (RDS, SAM, EC2, Cloudwatch, S3, etc)

EXPERIENCE

Oregon State University Sustainability Office | *Vue.js, Node.js, AWS (RDS, SAM)*

Dec 2022 - Present

Software Engineer Intern | (Remote)

github.com/OSU-Sustainability-Office

- Overhauled the frontend of OSU's [Energy Dashboard](#) by adding search input by building name and filters by energy type, allowing users to more efficiently pinpoint energy usage of specific buildings on campus
- Implemented an alert system via AWS Elastic Container Service and Node.js to automatically detect energy meter outages and data upload errors en route to the database, greatly improving site reliability
- Deployed web scrapers on AWS to extract data from other energy tracking sites OSU uses (e.g. Pacific Power and SunnyPortal), so that users can see all the data in one place on Energy Dashboard
- Oversaw transition of CI pipeline from TravisCI to Github Actions due to limited resources / funding, saving an estimated 10% costs to OSU Sustainability Office monthly

UnitedHealth Group (Optum) | *React, Typescript, Java Spring Boot, Azure Cosmos DB*

June - Aug 2023

Software Engineer Intern

Irvine, CA

- Implemented search functionality for an internal website at Optum that keeps track of AI models
- Developed various frontend components using React, including a search bar, search filter checkboxes, and search results page
- Used React Redux and Typescript interfaces to handle complex React state interactions between the search bar input, search filters, and query strings to send to the Java backend
- Wrote unit tests for frontend components using Storybook library, ensuring accessibility and good styling

PROJECTS

TalkToBeavs (Social Media) | *MongoDB, Express.js, React.js, Node.js*

github.com/Nyumat/TalkToBeavs

- Deployed a full stack Giphy API integration feature, allowing users to pick a GIF either a "trending" GIF, or search for a specific GIF by topic
- Implemented a WebSocket based text chat, sending user information between clients for an intuitive experience
- Improved UX by adding loading spinners where needed to account for asynchronous Redux / MongoDB updates
- Nominated by professor for "Hall of Fame" in CS 494 Advanced Web Development course

HitRuns | *Next.js, Typescript, React Bootstrap*

github.com/solderq35/hitrans

- Developed a customized Hitman 3 leaderboard frontend, using data from the speedrun.com API
- Designed mobile-friendly, responsive navbars, and dropdown menus using React Bootstrap
- Features 50% faster loading times, responsiveness than the official speedrun.com site due to streamlining leaderboard features, and caching website requests periodically with [GetStaticProps](#), a Next.js feature
